LCKAM LOCK ALARM

LOCK ALARM- 2.4M/4.6M CABLE

SURE24's Lock Alarm secures and alarms any large product within seconds. From motorbikes to horse equipment, garden tools to fishing equipment, the Lock Alarm is a very simple cable lock system to enhance security. It is supplied with two fixing options. Wall bracket for permanent fixing to garages/workshops/tack rooms etc and a 'U' bracket to attach to mobile items i.e. bokes, quads, trailers etc.

A 120 dB siren sounds if any attempt to cut or break the cable or any attack is made on the chasis/lock of the alarm. It is extremely simple to use; just wind the cable around the product and lock it. The alarm is safe to use inside and outside as it can be used in all weathers.

The alarm can either be used as a portable alarm, so you can set it up where ever it is needed, or, using the wall bracket, the alarm can be anchored to a wall or post, so products that are stored near the alarm can have the cable around them.

The cable comes in two lengths, 4.6m and 2.4m, so larger products can be protected as well.

Features

- Very simple to use and set-up
- Cable is easily and neatly stored when not in use
- Portable or anchored to wall
- 120+ dB siren
- Gives an excellent level of security to hard to secure products.
