## SGGB GLASS GUARD

### SUREGUARD GLASS GUARD

The SUREGUARD SGGB Glass Guard protects windows and frames from attack. With its modern design and simple set-up this is a very simple effective product.

It works by sensing shock or vibrations. Upon detection a 100+ dB siren is activated. There are various sensitivity settings, so that alarms can be calibrated to suit their settings.

The SGGB attaches to the window using 3M adhesive tape, which is extremely strong so that the alarms will not slip when affected by condensation. No need for screws or fixings, just stick it in position.

Protects windows and frames from attack. Suitable for windows, doors and cabinets. Responds to vibration or shock. Fit in under a minute. Battery operated, no screws or wiring required. High or low volume settings. 110 dB Siren

#### Features

- Variable sensitivity settings
