

SURE

SGSTB SAFE-T BAR

DOOR OPEN RESTRICTOR

The SGSTB has been designed specifically for UPVC doors and windows.

With its shaped and robust styling the ventilation lock is an excellent home safety device allowing the window to be opened for air flow but remained locked preventing entry through the window. It is simple and easy to use as no key is required.

It can be used on UPVC doors in the same way that a door chain is used, but as there is no chain, the door will not be scratched. Suitable for inward and outward opening doors.

The SGSTB is available in white and two different packing pieces are provided to cater for the differing heights between the leaf and frame.

Features

- Excellent added security for doors and windows
- A home safety door chain type device
- Non-Handed
