SG390 - Personal Attack Alarm

Key Features and Benefits

The SUREGuard Elite is a revelation in design and engineering, it is the first of its kind as unlike conventional personal attack alarms there is no pull cord and the risk of accidental activation is avoided.

With its stylish looks and simplicity, the Elite is not just a personal attack alarm it's a fashion must, it can be worn on your person attached to a belt, or worn on a lanyard and why not customise your own logo.

With the new great feature of no pull cords this makes this more appealing to the medical profession and retail employees. Simply use an anti-bacterial wipe and the device is clean, no risk of bacterial infection.

Activating the device is unlike no other on the market. Simply pressing the sides will activate the siren, and resetting the alarm is done by pushing the bottom of the alarm.

RoHS Compliant.
