SURE TRANSPORT

# SUREVIEW MONITOR
# TFT-LCD

12.3” screen size
720p HD screen resolution
128gb TF storage card
AHD 1080p/720p cameras
Display area 292.32 x 109.62mm

## Why buy me?

The brand new electronic mirror system "SUREVIEW" has been designed and manufactured to aid bus drivers and operators of heavy vehicles when checking blind spots and wing mirrors. This piece of equipment sits inside the vehicle and therefore avoids all risks of the outside mirror being clipped or clipping another object.

Outside mirrors have been known to hit pedestrians and passing vehicles whilst in operation and this new inside cam will avoid that problem.

This device is the hot topic of the bus industry. With a 12.3” screen size drivers are able to monitor their surroundings without being visually obstructed shilst driving. The picture displayed on the monitor is crystal clear as it displays HD video through the MSV8 camera.

# SUREVIEW CAMERA **MSV8**

8 Infrared LEDs
0 Lux sensitivity (IR LED on)
PAL/NTSC connectors
IP67 weatherproofing
100 x 85 x 97mm
Image sensor: 1/3” CMOSARO130

## Why buy me?

This camera fits externally on the vehicle to replace bulky wing-mirrors whilst driving heavy vehicles. This compact camera provides clear HD video for monitoring on the TFT-LCD screen. This camera also comes with built-in IR LEDs for viewing footage in low light conditions (night or tunnels).

Paired with the TFT-LCD this camera makes for the perfect internal blindspot checker.
